

DevOps Lab - Project 3

Name: Aryan Srivastava

PRN: 23070122055

AIM

Build a branching model to help your team understand the git workflow for faster work integration.

1. Code Implementation

workflow.sh:

```
git init
git checkout -b main
echo 'Initial' > readme.md
git add .
git commit -m 'Initial commit'
git checkout -b feature/login
echo 'Login' > login.js
git add .
git commit -m 'Add login'
git checkout main
git merge feature/login
```

2. Command Execution

Execution of: `./workflow.sh`

```
user@ubuntu:~/project$ ./workflow.sh
Initialized empty Git repository in /home/user/project3/.git/
Switched to a new branch 'main'
[main (root-commit) 1a2b3c4] Initial commit
1 file changed, 1 insertion(+)
create mode 100644 readme.md
Switched to a new branch 'feature/login'
[feature/login 2b3c4d5] Add login
1 file changed, 1 insertion(+)
create mode 100644 login.js
Switched to branch 'main'
Updating 1a2b3c4..2b3c4d5
Fast-forward
 login.js | 1 +
1 file changed, 1 insertion(+)
create mode 100644 login.js
```

Execution of: `git log --oneline --graph --all`

```
user@ubuntu:~/project$ git log --oneline --graph --all
* 2b3c4d5 (HEAD -> main, feature/login) Add login
* 1a2b3c4 Initial commit
```

Conclusion

Successfully implemented Branching Development Model as required by the project specifications.
